

Cell Connect™

The Cell Connect™ is designed to streamline the addition of hematopoietic stem cells and freezing solution into up to four CryoStore™ freezing bags to prepare for cryopreservation.

It is designed to be sterile docked to both your stem cells and freezing media for closed system transfer of products, potentially eliminating the need for a clean room.

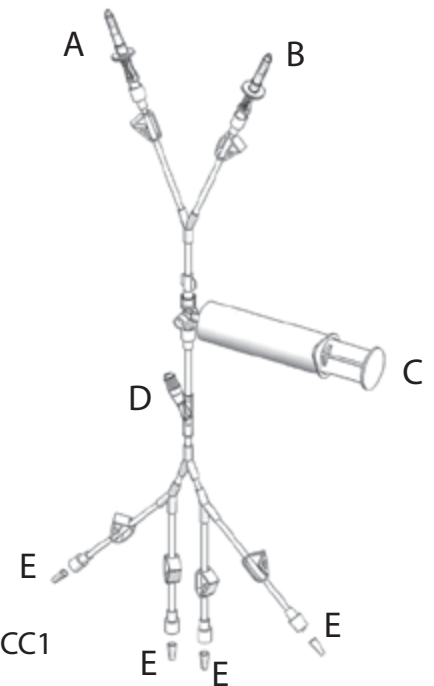

The benefits of using Cell Connect™ include:

- Ease of use saves on training time needed for laboratory personnel
- Efficiency - make 6 connections and you are done
- Closed system reduces contamination issues
- Needle-free processing reduces potential for injury
- PVC tubing allows for sterile docking

Cell Connect™

Example of use:

Close all pinch clamps. Attach cells to spike (A) and attach freeze media to spike (B). Attach up to four CryoStore™ freezing bags via male luers (E). Seal off any unused tubes to reduce cell loss. Open pinch clamps to the desired pathway, transfer cells and solutions. A rocker or oscillator is recommended for freeze media addition.

Product Code: CC1

Product Code	Description	Stock/Non-Stock	Case Qty
CC1	Two spikes to a 3-way stopcock, 60ml syringe and needle-free valve to four male luers with 70cm SCD tubing and pinch clamps.	Stock	12
CC2	One spike and male luer to a 3-way stopcock, 60ml syringe and needle-free valve to four male luers with 70cm SCD tubing and pinch clamps.	Stock	12
CC35-5MT	5 male luers with pinch clamps. Intended as an add-on to CC1 or CC2 via sterile dock to create 5 additional terminals for a total of 8 SCD connections for CryoStore™ bag filling.	Non-Stock	12

Individually packed in Tyvek® pouch, supplied sterile, for single use only.
