

## QuantiFluo™ HRP Reagent (QFHRP-25mL)

### Liquid Substrate Reagent for Detecting Horseradish Peroxidase Activity

#### DESCRIPTION

QuantiFluo™ Horseradish Peroxidase Reagent is a stable 10-Acetyl-3,7-dihydroxyphenoxazine (also called Ampliflu Red) liquid substrate reagent formulated for detecting horseradish peroxidase HRP activity, e.g. in ELISA. This reagent produces a highly fluorescent product ( $\lambda_{ex/em} = 530/590\text{nm}$ ) when reacted with  $\text{H}_2\text{O}_2$  by a peroxidase. The fluorescent product can also be visualized under a light source ( $530 \pm 20\text{ nm}$ ).

#### CONTENTS: catalog # QFHRP-25mL

QuantiFluo™ HRP Reagent    25 mL Reagent  
   100  $\mu\text{L}$  3% Stabilized  $\text{H}_2\text{O}_2$

The provided reagent is sufficient for 500 assays (96-well plate format).

#### Instructions for use

Prior to assay, bring reagent to room temperature. Add 1  $\mu\text{L}$  3% hydrogen peroxide per 1 mL HRP Reagent. For ELISA, use 50  $\mu\text{L}$  Reagent/ $\text{H}_2\text{O}_2$  per well in 96-well plate assays or 20  $\mu\text{L}$  per 384-well plate. Tap plate briefly, and incubate 30 min at room temperature. If desired, stop the reaction with 10 mM KOH (56 mg KOH/100 mL  $\text{H}_2\text{O}$ ). Read fluorescence at  $\lambda_{ex/em} = 530/590\text{nm}$ .

**Handling:** this product is shipped on ice. For long-term storage, keep reagent at  $-20^\circ\text{C}$ . Shelf life of 1 year after receipt.

**Bulk order** of any size (>125 mL) is available. Please contact [info@bioassaysys.com](mailto:info@bioassaysys.com).

#### PRECAUTIONS

Reagents are for research use only. Normal precautions for laboratory reagents should be exercised while using the reagents.

Avoid contact and inhalation. Standard laboratory safety procedures should be followed when handling this product. Safety procedures include wearing OSHA approved safety glasses, gloves and protective clothing.

If eye or skin contact occurs, immediately wash affected area with soap and copious amounts of water for at least 15 minutes. Assure adequate flushing by separating the eyelids with fingers. Call a physician to seek medical advice.

If swallowed, wash out mouth with water provided person is conscious and call a physician to seek medical advice.

If inhaled, move individual to fresh air and call a physician to seek medical advice.
